

FOR IMMEDIATE RELEASE

Jim Caveny joins SES as VP Technology

Houston, TX (July 1, 2003) – Seismic Equipment Solutions (SES) today announced that Jim Caveny has been appointed VP of Technology. Mr. Caveny has over fifteen years with Input/Output (I/O) beginning in I/O Canada's Customer Service Department – positions included President of I/O Canada, Customer Service Manager of I/O USA and Product Architect in I/O Land Engineering.

Mr. Caveny has extensive experience with I/O System Two MRX & RSR instrumentation, along with the latest System Four VectorSeis™ technology available from I/O.

"I am pleased that Jim has accepted this important role in our company," said Glen Huscroft, President of SES. "Few people know the I/O equipment better than Jim. One of his responsibilities while at I/O included testing the user friendliness and robustness of their new systems, so his experience spans all the way from the field into engineering design. Jim will be in charge of the entire Customer Service Department, with his primary responsibility shifted toward the customers and their needs. We look forward to Jim's leadership and technological know-how in developing ways and means for SES to provide superior support and service both now and in the future."

About Seismic Equipment Solutions

With headquarters in Houston, Texas, and representatives in Moscow, London, Calgary, Bogota, and Jakarta, SES is a global leader in seismic equipment rentals and support. SES provides exceptionally maintained lease equipment, field support, training, equipment repairs, and part sales.
