

FOR IMMEDIATE RELEASE

Casey Jordan Joins Seismic Equipment Solutions (SES) as Manager of Technical Support

Houston, TX (April 28, 2006) – Casey Jordan joins Seismic Equipment Solutions LP (SES) as Manager of Technical Support, adding almost 30 years of field experience to the company. Prior to SES, Casey worked at Sercel Inc. for 10 years as a Senior Field Service Engineer; working with Sercel SN388, 408UL, 408CMXL, VE432, and other products. He has traveled extensively both domestically and internationally, providing customer service and training.

Casey began his career with Geophysical Service Inc. in 1977 and continued working for GSI until the Halliburton Geophysical merger of GSI and GeoSource; at which time he became a member of the HGS Customer Service team - MDS-16, MDS-18, MDS-18X and DFS VII were the acquisition systems of the day. Casey worked with the engineering teams, at both HGS and Western Geophysical, developing the Vision and WGLS Western systems.

When Input-Output acquired the products division of Western Geophysical, he worked with the I/O team, supporting the I/O System Two MRX and RSR systems.

"We are very excited to have Casey as our Manager of Technical Support" comments Glen Huscroft. "Casey's vast knowledge of both Sercel and I/O systems will greatly enhance our ability to support our customers, and our rental equipment. In my opinion, Casey is the best Sercel 408 training and support engineer in the industry today".

About Seismic Equipment Solutions

With headquarters in Houston, Texas, and representatives in Moscow, London, Calgary, Bogota, and Jakarta, SES is a global leader in seismic equipment rentals and support. SES provides exceptionally maintained lease equipment, field support, training, equipment repairs, and part sales.
