

## **FOR IMMEDIATE RELEASE**

CONTACTS: Director of Marketing, Seismic Equipment Solutions, 281.313.9494

### Seismic Equipment Solutions Hires New CFO

Houston, TX (August, 2009) – Seismic Equipment Solutions (SES) added a new member to its management team in August - Chief Financial Officer, Rick Luke. SES is proud to welcome Mr. Luke, an industry financial leader who will help guide the Company's continued growth.

Mr. Luke comes from WellDynamics, the world's leading provider of intelligent completion technology to the upstream oil industry, where he served as Chief Financial Officer.

Over his 27 year career in the oil and gas industry, Mr. Luke has served as both financial manager and general manager in numerous countries. Prior to joining WellDynamics, Mr. Luke was with Halliburton, where he served as Vice President of the Europe/Africa Region, based in London, from 2000 to 2003. Prior to that assignment, he worked as Director of Shared Services for Europe and Africa for Halliburton, and held several financial and administrative management positions in Europe, Africa and the United States.

“We are very excited to add Rick as a member of our executive leadership team”, commented Glen Huscroft, company CEO. “His strong financial background, track record of operational success and history of creating value for some of the industry leaders make him an important addition to the company. We are confident that his knowledge, expertise and stature within the financial community will be instrumental in contributing to our success.”

Luke earned a Masters of Business Administration degree from Oklahoma City University and a Bachelor of Science degree in Accounting from Oklahoma State University. He is a Certified Public Accountant.

### **About Seismic Equipment Solutions**

With headquarters in Houston TX and representatives in Moscow, London, Calgary, Bogota, and Jakarta, SES is a global leader in Land, Marine and Downhole seismic equipment rentals. SES provides expertly maintained lease equipment, field support, training, equipment repairs, and part sales. Customers can accommodate large spikes in equipment demand while highly trained Field Support Engineers help crews get up and running fast. Experienced Repair Technicians get equipment upgraded or repaired quickly and accurately and our large inventory of in-stock and hard to find parts help get your equipment back in play as soon as possible.
